

Aerodynamic cycle wheel

Patent number: DE4416796
Publication date: 1995-11-09
Inventor: HOLSTEIN WOLFGANG DR ING (DE)
Applicant: HMS ANTRIEBSSYSTEME GMBH (DE)
Classification:
- international: B60B5/02; B29C70/00
- european: B60B5/02; B29C70/08C
Application number: DE19944416796 19940506
Priority number(s): DE19944416796 19940506

Abstract of **DE4416796**

A wheel, esp for a cycle comprises a low to medium density core ring (9) enclosed in a fibre reinforced plastic la (10) and a second closed ring (11a, 11b, 11c) radially adjacent to the first (9). The second ring is designed to have little influence on rim stiffness.
